Summary

Mining engineering student (Last year, Mines and Infrastructure Engineering – AE3S, ENSMR) with an engineering degree in Mines and Resource Management, specialized in geotechnics and mining. Hands-on experience in open pit operations (haulage/loading optimization, fleet management system analysis, short- and long-term planning using Surpac), in mineral processing and metallurgy (processing optimization) and in geotechnical studies, using software such as Plaxis and Rocscience, complemented by Python/JavaScript tools and deep-learning computer vision. **Searching for an internship from January 2027 for a period of 4 to 6 months.**

Experience

Production Engineer Intern Jul 2026 – Sep 2026
SNIM, Guelb El Rhein Mining Site – Zouerate, Mauritania
Diagnosis and optimization of the haulage/loading cycle on a magnetite iron ore extraction site (PB2-East sector, target of 3 Mt/month): managed the fleet management system (FMS) and a fleet of 40 CAT 789D trucks and 10 mining shovels. Analyzed cycle time breakdowns, FMS flaws and rolling resistance; modeled pit topography and haul road profiles in Surpac, and used Python and JavaScript to design a platform for time cycle calculation.
Keywords: Dispatch data, Time study, Fleet sizing, Haul roads, FMS Analysis, Python / Excel, Surpac

Metallurgical Engineer Intern Jul 2025 – Sep 2025
First Quantum Minerals (MCM) – Akjoujt, Mauritania
Optimization of SAG mill operational parameters and comprehensive delay detection across processing plant circuits; conducted plant operational monitoring to improve overall comminution efficiency and plant throughput.
Keywords: SAG Mill Optimization, Delay Analysis, Process Monitoring, Plant Operations

Geotechnical Engineer Intern Jul 2024 – Sep 2024
SMH (Mauritanian Hydrocarbons Co.) – Nouakchott, Mauritania
Drilling geology reports, soil identification, classification and mechanical testing, seismic interpretation and archive analysis.
Keywords: Drilling geology, Seismic interpretation, Soil classification, Mechanical tests

Education

Double Degree M.Eng: Mines and Infrastructure Engineering 2025 – 2027
Rabat School of Mines, Rabat, Morocco

Geotechnical Fundamentals for Underground Mining (Online Program) 09/29/2026 – 02/23/2027
Geotechnical Center of Excellence, University of Arizona – Status: enrolled (GMEF Scholarship)

Engineering Degree (M.Eng): Mines and Resource Management 2023 – 2025
E.S. Polytechnique Nouakchott, Mauritania
Specialization: geotechnical and mining engineering

National Engineering Exam 2023
E.S. Polytechnique Nouakchott – Preparatory Classes, Mauritania (2021 – 2023)

Baccalaureate in Mathematics *Lycée Militaire, Nouakchott, Mauritania*

Skills

Technical: Mine planning (Surpac, Datamine), rock and soil mechanics, process engineering, geostatistics, geotechnics.
Software: Rocscience (Dips,Unwedge), Plaxis, Surpac, ArcGIS, Qjis, GlobalMapper, Datamine, IPi2win, Geo5, MS Office.
Other: Project management, Python, JavaScript, computer vision, teamwork, technical reporting.

Academic Projects

- **Automated grain size classification** (Oct 2025 – Jan 2026, ENSMR, Rabat) – particle size analysis by deep learning, U-NET architecture for semantic image segmentation.
- **Open pit design with Surpac** (Mar – May 2025, ESP, Mine Design Project) – orebody modeling, pit limit optimization using Lerchs-Grossmann (LG) and floating cone algorithms, and optimization of pit slopes and pit design.

Languages

French: Advanced – DALF C1 | **English:** Upper-intermediate – TOEIC B2 | **Arabic:** Native language

Certifications

DALF C1 (France Éducation, 2024); TOEIC (ETS Global, 2023); Google Project Management, Coursera (2022)
